

## Special Issue

# The Role of Heat Shock Proteins: From Molecular Mechanisms to Therapeutics: 2nd Edition

### Message from the Guest Editor

Many heat shock proteins (HSPs) are essential for survival and play a critical role as molecular chaperones in maintaining cellular proteostasis through the integration of protein folding and degradation pathways. However, it is becoming generally accepted that HSPs have additional cellular functions beyond their role in proteostasis, and we are only just beginning to understand their biological function from a whole-of-organism perspective. HSPs are also linked to a range of different human disorders and infectious diseases, with changes in their expression and localization linked to disease pathology. While HSPs are highly conserved from bacteria to humans, structure–function studies are revealing subtle yet distinct differences across species and between normal and diseased cells. Hence, HSPs are now considered *bona fide* drug-targets in the fight against disease and infection. Contributions to this Special Issue will provide new insights into the mechanisms of action of HSPs, deepen our understanding of their biological role in health and disease, and reveal novel HSP-based therapeutic opportunities, especially innovative drug discovery insights.

### Guest Editor

Prof. Dr. Gregory Blatch  
The Vice Chancellery, The University of Notre Dame Australia,  
Fremantle, WA, Australia

### Deadline for manuscript submissions

closed (20 October 2025)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
