

Special Issue

Molecular Research Progress of Antibacterial Material

Message from the Guest Editor

Globalization includes not only commercial aspects but also microbiological aspects that have led to the geographical spread of bacterial-caused diseases traditionally confined to a certain region in the planet. Also, the use of many disinfection techniques has led to the increased resistance of bacteria to traditional chemicals. This Special Issue will offer an interdisciplinary forum for all researchers interested in antibacterial materials and technologies, ranging from novel nanostructures to innovative disinfection methods, as well as some molecular-based designs and analyses. Articles discussing all types of theoretical and applied aspects of antibactericides at a molecular level are welcome, and we expect to end up with a unique forum to not only report the most recent developments but also offer a prospective view of what developments the world could expect in this area.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
