

## Special Issue

# Epigenetic Mechanisms in Pain

### Message from the Guest Editor

This Special Issue aims to build a high-level academic exchange platform and invites original research and review articles in the following areas:

- Epigenetic regulation mechanisms in pain signaling pathways;
- Discovery of innovative epigenetic biomarkers for pain;
- Epigenetic changes in response to inflammation or chronic drug exposure;
- Preclinical or clinical studies evaluating epigenetic-targeted therapies for pain relief.

We sincerely look forward to receiving multi-layered studies ranging from molecular mechanisms to system integration that elucidate the critical roles of epigenetic regulatory networks in pain progression. Your outstanding work will bring new momentum to the advancement of pain medicine and will help open up new horizons in the field of pain therapy.

---

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
