Nanocellulose: Recent Advances and Green Applications

Message from the Guest Editor

Nanotechnology is a rapidly evolving technology; science, engineering and technology have merged to bring nanoscale materials that much closer to reality. Nanotechnology has demonstrated the potential to improve and diversify forest-based products for new cellulosic-based applications with different properties. Through nanotechnology, bulk cellulose have been used to generate cellulose at the nanoscale: so-called nanocelluloses, such as cellulose nanofibrils and cellulose nanocrystals. After appropriate conversion and extraction technologies as well as modification and characterization, nanocelluloses have their intriguing properties. There is a great opportunity for nanocellulose, but there are several challenges which need to be addressed. This Special Issue, "Nanocellulose: Recent Advances and Green Applications", aims to meet the challenge associated with the synthesis, properties, modification, application and development of nanocellulose, and gather knowledge of original research and review articles in this field.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
