

## Special Issue

# New Therapeutic Strategies for Lung Cancer: An Update

### Message from the Guest Editor

Lung cancer is the leading cancer cause of death worldwide in recent decades, mainly divided into non-small cell lung cancer (NSCLC) and small cell lung cancer (SCLC). Lung metastasis is regulated by several elements, such as the interactions among various types of signaling in the lung cancer microenvironment and epithelial–mesenchymal transition (EMT). At the same time, there have been significant advances in lung cancer therapies, such as chemotherapy, targeted therapy, radiotherapy, and miRNA-based therapy immunotherapy. This Special Issue on “New Therapeutic Strategies for Lung Cancer: An Update” aims to provide value for future investigations and promising therapeutic clues. It is also focused on the discovery of molecular insights and potential therapeutic approaches. Authors are invited to submit original research and topical review articles related to these topics.

### Guest Editor

Dr. Mi Kyung Park

1. Department of Cancer Biomedical Science, Graduate School of Cancer Science and Policy National Cancer Center, Goyang 10408, Republic of Korea

2. Department of Bio-Healthcare, Hwasung Medi-Science University, Hwaseong-si 18274, Republic of Korea

### Deadline for manuscript submissions

closed (20 October 2023)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
