

Special Issue

Metastasis: Mechanisms, Models, and Therapeutic Advances

Message from the Guest Editor

This Special Issue is led by with the assistance of our Topical Advisory Panel Members and the GE's assistant editor Dr. Amy Wilson (Centre for Cancer Research, Hudson Institute of Medical Research, Clayton, VIC 3168, Australia). We welcome submissions in the following areas:

- Mechanistic studies on the molecular drivers of metastasis;
- Novel experimental models of metastasis, including patient-derived models;
- Targeted therapies aimed at metastasis prevention or treatment;
- The role of the tumor microenvironment in metastatic progression;
- Biomarkers for early detection of metastatic potential;
- Immune-based strategies to combat metastasis;
- Clinical translation of novel therapies targeting metastatic disease.

We invite you to contribute in the form of an article or a review.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
