

## Special Issue

# Molecular Research Progress of Inherited Cardiomyopathies

### Message from the Guest Editor

The heart is one of the earliest-forming organs during development, and many genes contribute to its morphogenesis and function. Consequently, the diversity of genetic disorders that manifest with cardiomyopathic dysfunction is extensive. Functionally, defects in transcription, signaling, mitochondrial function, metabolism, cellular architecture, autophagy, chaperone function and other molecular and cellular processes have been implicated. Strategies to treat inherited disorders range from gene and enzyme replacement therapy to molecules that attenuate the consequences of primary gene dysfunction. Mechanisms of inherited cardiomyopathy gene dysfunction are sometimes relevant in acquired cardiomyopathies as well. For many inherited cardiomyopathies, however, disease-targeted therapy remains an elusive goal and ongoing unmet need. Understanding the molecular basis of inherited cardiomyopathies will provide wide-ranging insights into the mechanisms of cardiovascular disease and provide opportunities for better therapeutic targeting.

### Guest Editor

Prof. Dr. Michael T. Chin

Molecular Cardiology Research Institute, Tufts Medical Center, Boston, MA 02145, USA

### Deadline for manuscript submissions

closed (31 October 2023)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
