Bioactive Compounds in Neurodegenerative Diseases

Message from the Guest Editor

Neurodegenerative diseases are a group of progressive conditions that affect the nervous system, leading to the gradual deterioration and death of neurons. These diseases, which include Alzheimer's, Parkinson's, Huntington's, and amyotrophic lateral sclerosis (ALS), among others, are characterized by various pathological hallmarks such as the accumulation of misfolded proteins, neuroinflammation, and oxidative stress. Bioactive compounds have emerged as potential therapeutic agents in the context of neurodegenerative diseases. These molecules can modulate various cellular pathways and targets associated with disease pathology. They are known to play roles in suppressing inflammation, regulating gene expression, maintaining cellular membrane fluidity, and supporting immune functionality. This Special Issue aims to uncover the role of bioactive molecules in treatment strategies in neurodegenerative diseases, as well as their potential to mitigate neuroinflammation, oxidative stress, and neuronal loss. Original and review articles, including basic studies, are all welcome to be submitted.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
