Perinatal Microbiome: Molecular Prospects and Hurdles

Message from the Guest Editor

The perinatal microbiome, a critical determinant of infant health, has garnered significant attention in recent years. This field explores the complex interplay between maternal, fetal, and neonatal microbiomes, as well as their implications for long-term health outcomes. With advancements in molecular technologies, we now have a deeper understanding of microbial colonization patterns and their impact on development. This Special Issue aims to highlight cutting-edge research on perinatal microbiome dynamics, including prenatal influences, birth mode effects, and postnatal interventions. We invite submissions that address novel findings, challenges, and future directions in this exciting area.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
