Special Issue

Roles and Mechanisms of Non-Coding RNAs in Human Health and Disease

Message from the Guest Editors

Initially considered as splicing errors or transcripts originating from "junk DNA", non-coding RNAs (ncRNAs) are now recognized as key actors of cellular physiology and pathology. The new millennium brought to light the existence of long non-coding RNAs (IncRNAs) and circular RNAs (circRNAs). The results of the Human Genome Project, which was published in 2001, showed that about 85-90% of our genome is transcribed in RNA, even though only proteins cover about 1.2% of the entire genome. Since this groundbreaking discovery, various articles have reported on IncRNAs and circRNAs, showing that these molecules play a crucial role in cells as epigenetic regulators of almost all biological processes, similar to the already known microRNAs (miRNAs). This Special Issue will describe the current knowledge on ncRNAs (including miRNAs, IncRNAs, and circRNAs) in physiological and pathological processes, including the onset and progression of diseases. We welcome research articles and reviews on altered expression in tissues or body fluids, polymorphisms, or splicing variants of ncRNAs that are associated with specific disorders.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
