Kidney Diseases: From Molecular Basis to Therapy

Message from the Guest Editor

Chronic kidney disease (CKD), defined as the presence of abnormalities of kidney function or structure lasting at least three months, is an epidemic health issue that requires global attention. The global rise in the incidence of CKD has been accompanied by a general increase in human longevity, as well as an increase in the traditional and non-traditional risk factors for the disease. CKD is associated with significant comorbidity and mortality, being responsible for enormous healthcare costs. We invite you to submit novel research about molecular and cellular mechanisms involved in kidney injury.

Guest Editor

Dr. Jana Reiterová

Department of Nephrology, First Faculty of Medicine, Charles University, 128 08 Prague, Czech Republic

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
