Nanomaterials in Modern Medicine

Message from the Guest Editor

Nanotechnology offers many possibilities in modern therapies, and this application is referred to as 'nanomedicine.' The field of nanomedicine merges the physical, chemical, and biological fields, and creates a huge potential to overcome treatment challenges in medicine. Nanomaterials, i.e., materials with dimensions in the nanoscale (up to a few hundred nanometers), have played an essential role in modern medicine, with applications in preventing, diagnosing, and treating various diseases. The main applications of nanomaterials in medicine include contrast agents, carriers for drug and gene delivery, carriers for vaccines, antimicrobials, and more. However, nanomaterials also bring unique environmental and societal challenges, particularly regarding toxicity. We invite researchers to contribute original research and review articles. The topics relate to all aspects of nanotechnology and nanomaterials in medicine, i.e., nanomedicine, from the simple synthesis of nanomaterials with promising properties for bio-medical application up to the clinical application of novel nanomaterials.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
