New Technologies and Approaches for Skin Disease Treatment

Message from the Guest Editors

Skin problems (infections, inflammation, lesions, etc.) can be treated more efficiently by treatments performed directly in the site of interest without involving healthy tissues. Moreover, the therapy should be more efficacious if properly customized according to patient characteristics (age, gender, etc.) and needs. The aim of this Special Issue is to describe innovative approaches for efficacious treatment of skin diseases, including new molecules, new delivery systems and new formulations. Moreover, papers dealing with new understanding of physiological mechanisms involved in the control of inflammation mechanisms, infection and skin repair will be welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
