Role of Immune Cells in Cancers

Message from the Guest Editor

Fighting tumor cells is a challenge for the immune system, as tumor cells employ various immune escape mechanisms to evade the immune system, which is crucial for their persistence and progression. Emerging treatments (e.g., cellular, antibody based, hypomethylating, apoptosis-inducing, or personalized mutation-targeting) strategies against cancer emphasize (personalized) approaches to improve patient outcomes. Immune monitoring (quantifying tumor or immune-cell-related functions) has become a crucial tool for guiding therapies, assessing immune response, detecting dysfunction, (potentially) predicting the quality of remissions or relapses, and contributing to prognosis. The scope of this Special Issue includes research on human or animal hematopoietic or solid tumors and the role of soluble/released/nucleic acid related or cellular components of the immune system. We are particularly interested in manuscripts that contribute to our understanding of tumor biology in detail and which deduce strategies to monitor the factors that contribute to improving therapy decisions and, as a consequence, patient prognosis.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
