# Protein Structure-Function Relationships and Inhibition: From Molecular Insights to Therapeutic Applications

### Message from the Guest Editors

Proteins are central players in all biological processes. A fundamental paradigm of structural biology assumes that the functionality of these macromolecules is strictly related to their three-dimensional structures. In this scenario, the understanding of protein structures is a prerequisite for modulating their activities and for developing new therapeutic agents targeting these giant biomolecules. The acquisition of atomic-level structural information about proteins is also fundamental for their modulation. For decades, this task has been extremely difficult due to the complex and time-consuming methodologies utilized to obtain experimental structural data. Very recently, the introduction of effective machine-learning-based approaches, such as Alpha Fold, has provided accurate structural information about proteins, starting from their amino acid sequences. This represents an extremely useful tool for the development of novel molecular entities aimed at enhancing or impairing protein functions.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
