

## Special Issue

# New Insights into the Use of Mouse Models for the Study of Musculoskeletal Diseases

### Message from the Guest Editor

In this special issue, we invite authors to submit original articles and reviews that contribute to a better understanding of the following topics: use of murine models in understanding the physiology of the musculoskeletal system, new murine models for the study of the musculoskeletal system, murine models for therapeutic approaches to osteoporosis, sarcopenia, muscle atrophy, osteoarthritis, and many others. The authors are also invited to contribute new emerging research on the use of cellular models, with particular focus, but not exclusive, on the study of co-culture cellular systems involving cell (or organoid) interactions that mimic the musculoskeletal system.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
