Emerging Biological Markers and Molecular Targets in Bladder Cancer

Message from the Guest Editor

Bladder cancer remains one of the most prevalent malignancies of the urinary tract, marked by high recurrence rates, molecular heterogeneity, and a complex tumor microenvironment. The discovery and validation of novel biological markers hold great promise for advancing diagnosis, prognosis, and personalized therapeutic strategies. This Special Issue aims to highlight cutting-edge research on molecular and cellular biomarkers, genetic and epigenetic alterations, liquid biopsy techniques, and emerging therapeutic targets relevant to urothelial carcinoma. Studies employing multi-omics approaches, bioinformatics, AI-driven analytics, and translational or clinical models are particularly encouraged. We welcome original research articles, systematic reviews, and comprehensive overviews that address emerging trends in biomarker discovery, validation, and clinical implementation in bladder cancer. We warmly invite you to contribute your latest findings to this Special Issue.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Inorganic Chemistry)
