Protein-Polysaccharide Complexes: Structure and Physico-Chemical Properties

Message from the Guest Editor

Current trends in physicochemical biology and the search for new solutions to problems in biotechnology and medicine require more detailed information about the structure of such biopolymers as proteins and polysaccharides, as well as their complexes. In addition to their individual functions in living systems, proteins and polysaccharides are involved in the formation of supramolecular structures that carry a specific structural and functional load. Fundamental studies of intermolecular interactions of biological macromolecules and the formation of functional supramolecular complexes on their basis are an integral part of modern molecular biophysics. In terms of the variety of controlled properties, composite systems based on proteins and polysaccharides have great prospects. Due to their unique structural properties, including tunable physical, chemical, and biological characteristics, and good biocompatibility, protein-polysaccharide systems are promising materials in medicine and pharmacology.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
