

## Special Issue

# Gut Microbiota in Human Disease and Health

### Message from the Guest Editor

The gut microbiota represents a key environmental modifier of human health, which can have an impact on the onset and/or progression of gastrointestinal and extraintestinal diseases, as well as on the therapeutic response. However, its drivers of variation, its interactions with the human host and the underlying mechanisms remain incompletely understood. Likewise, there is a paucity of information on the impact of manipulating the gut microbiota for preventive and therapeutic purposes. This Special Issue aims to expand current knowledge on the role of the gut microbiota in health and disease, including the potential of its modulation in disease prevention and treatment. The use of multi-omics approaches (metagenomics, metatranscriptomics, metabolomics and culturomics) is encouraged, as well as the search for and validation of mechanistic insights. Purely clinical studies are not suitable, but clinical submissions with biomolecular experiments are welcomed. **Keywords:** gut microbiota; human disease; omics; microbiota–host interactions; microbiota manipulation

### Guest Editor

Dr. Silvia Turroni

Department of Pharmacy and Biotechnology, University of Bologna, Via Belmeloro, 6, 40126 Bologna, Italy

### Deadline for manuscript submissions

closed (20 April 2025)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
