

Special Issue

Novel Insights into Biochemical and Molecular Nutrition

Message from the Guest Editors

Nutrition has become an important subject and a critical issue for health. Aspects of nutrition, such as biochemical and molecular, affect the outcome of health-related research. Many scientists have contributed to the research on biochemical and molecular nutrition. These fruitful results have been beneficial to health and basic research. Therefore, this Special Issue aims to present a collection of articles focused on novel insights into biochemical and molecular nutrition, including the mechanisms and consequences, both in vivo and in vitro. Additionally, the links between nutrition and health or diseases can be investigated in aspects of biochemical and molecular nutrition. These may be associated with health promotion, disease prevention, disease therapy, or recovery in the population at any age after therapy. You are most welcome to share findings relevant to novel insights into biochemical and molecular nutrition that were obtained in your lab using reliable animal models and/or established cell models, and even through human studies.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
