

Special Issue

Molecular Advances in Lung Diseases 2.0

Message from the Guest Editor

Despite the various defence mechanisms present in the lung, serious diseases still develop. Any damage to the pulmonary tissue system due to inherited genetic diseases, acquired mutation induced neoplastic diseases, infections or ineffective immune mechanisms have a clear molecular basis, even if the scientific and medical community is not always aware of the complex connections.

Better understanding of diseases affecting both pulmonary morphology and mechanism of diseases is required for the development of better preventive measures, identification of diagnostic markers and novel therapies that are more effective.

To make the leap from the unknown to translation of scientific research of lung diseases, every morsel of new information counts. The present special issue awaits such scientific research articles and complex reviews that describe molecular advances in understanding of lung diseases to expand the opportunity to catalogue, connect and prepare the results for medical translation.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
