Recent Progress in 3D Cellular Models of the Tumor Microenvironment

Message from the Guest Editor

We invite you to submit original research articles, reviews, and perspectives that explore recent progress in 3D cellular models of the tumor microenvironment. The tumor microenvironment is a complex, dynamic ecosystem comprising tumor cells, stromal cells, the extracellular matrix, and various signaling molecules. While traditional 2D cell cultures and animal models have been foundational, they often fail to recapitulate the physiological relevance and complexity of the TME. To bridge this gap, advanced 3D cellular models have emerged as powerful tools, offering a more predictive and realistic platform for cancer research. We invite researchers to submit research articles with a focus on the following key areas:

- **Organ-on-a-Chip and Microfluidics**
- **Cancer Immunotherapy**
- **3D Model Systems and biomaterials**
- **Cell Mechanics and Mechanotransduction**

By bringing together cutting-edge research from these diverse areas, this Special Issue will provide a comprehensive overview of the state-of-the-art in 3D cellular models and accelerate the translation of new discoveries into clinical practice. We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
