Neurological Diseases: From Physiology to Therapy

Message from the Guest Editor

The diagnosis of neurological diseases is one of the most difficult challenges for medical professionals due to the complexity of the nervous system. Currently, more than 600 diseases have been identified including neurodegenerative diseases such as Alzheimer's disease and Parkinson's disease, cerebrovascular diseases, and others such as multiple sclerosis, migraine, neuroinfections, and neuromuscular diseases. According to a World Health Organization report, nervous system diseases affect up to one billion people worldwide. Neurological diseases include those caused by single gene abnormalities, such as Huntington's disease, spinocerebellar degeneration, and muscular dystrophy, and multifactorial diseases such as Alzheimer's disease, Parkinson's disease, and amyotrophic lateral sclerosis (ALS). In this Special Issue of "Neurological Diseases: From Physiology to Therapy", we invite investigators to contribute original research, review articles, or case reports focusing on the research area that extends from physiology and genetics to the treatment of neurological diseases.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
