Molecular Mechanisms and Signalling Pathways in Cardiovascular Pathophysiology

Message from the Guest Editor

As is well known, cardiovascular diseases are the leading cause of death worldwide. Understanding the pathophysiological processes that lead to the wide variety of these pathologies is essential to establishing the most appropriate treatments to combat them. In recent years, special interest has been gained in research into the subcellular processes associated with the pathophysiological particularity of each patient, with the aim of steering to more precise therapeutic strategies. This is why basic research into the cardiovascular pathophysiological intracellular signaling pathways and the molecular mechanisms involved in them is of crucial importance. Thus, this Special Issue welcomes articles that present new evidence that strengthens the knowledge of these pathophysiological mechanisms of the cardiovascular system, including cardiac and vascular excitation–contraction coupling dysfunction, endothelial damage, hypertension, heart failure, maladaptive hypertrophy, diabetic heart, and altered bioenergetics, among other mechanisms.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
