

Special Issue

Advances in Neurorepair and Regeneration

Message from the Guest Editors

The field of neurorepair and regeneration has undergone extraordinary advancement in recent years, fueled by breakthroughs in molecular neuroscience, biomaterial engineering, stem cell biology, and pharmacological development. While substantial progress has been achieved in fundamental research, the translation of experimental discoveries into safe and effective clinical treatments for neurological diseases still faces considerable bottlenecks and unresolved challenges.

This Special Issue titled *Advances in Neurorepair and Regeneration* intends to showcase state-of-the-art findings and interdisciplinary methodologies that deepen our insights into neural repair mechanisms and functional recovery.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
