Molecular Targeted Therapy for Gliomas

Message from the Guest Editor

Special Issue “Molecular Targeted Therapy for Gliomas” of the *International Journal of Molecular Sciences* aims to introduce novel findings on glioma tumour biology in areas such as the identification of molecular targets; innovative tools or techniques on molecular profiling; and targeting approaches that would enhance treatment efficacy, overcome chemoresistance, and promote drug delivery, with a view to explore new avenues for glioma treatment.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
