Natural Compounds with Cancer-Selective Toxicity 2.0

Message from the Guest Editor

The development of new cancer treatment strategies involving multiple compounds targeting different pathways is the current focus of research. Importantly, targeting metabolic, oxidative stress, and mitochondrial pathways could provide cancer-selective natural compounds. Natural compounds and their interaction with conventional chemotherapeutic regimens are necessary to clarify if natural compounds can be given as supplement to the conventional treatment for effective treatment of cancers. This Special Issue of *IJMS* invites research articles, reviews, and opinion reviews on fascinating advancements in the area of natural compounds with cancer-selective toxicity.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
