

## Special Issue

# Pathogenesis and Molecular Therapy of Brain Tumor

### Message from the Guest Editor

Brain tumors show unique and special molecular features. Glioblastoma is the most frequent primary brain tumor of adults. It shows an aggressive behavior and a poor prognosis. Despite intensive research on targeted therapy, there is still no curative therapy.

In this Special Issue, we shall discuss advances in understanding the pathogenesis of brain tumors and reveal novel molecular therapy approaches. We invite basic and translational as well as clinical researchers to contribute to this Special Issue. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
