

Special Issue

Novel Therapeutic Targets of Solid Cancer

Message from the Guest Editor

We are proposing a Special Issue on “Novel Therapeutic Targets of Solid Cancer”. Cancer is a complex genetic disease in which multiple pathways are involved in its development and progression. The identification of some key pathways of cancer pathogenesis is among the most spectacular achievements of modern biomedical science. This Special Issue of IJMS seeks to collect a series of original research articles and updated reviews that encompass all aspects of precision medicine through the identification of new targets in solid tumor oncology. Investigations in a myriad of fields such as biomarker discovery, “omics” approaches, such as pharmacogenomics, proteomics, genomics and transcriptomics are welcome. Work that helps decipher molecular changes and identify biomarkers and predictors of prognosis and behavior, as well as advances in therapeutic options and resistance mechanisms, are also topics of particular interest as are contributions on other significant topics that further enhance our understanding of molecular immunotherapy and all targeted cancer therapies.

Guest Editor

Dr. Valentina De Falco

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
