Biomechanics and Molecular Research on Glioblastoma

Message from the Guest Editor

Despite the significant amount of research on glioma published in the last decade, further studies are needed to design new therapeutic and diagnostic targets. Thus, identifying and understanding the key element(s) of new molecular mechanisms involving glioma growth and progression in the microenvironment are critical. In this Special Issue, particular attention will be paid to glioblastoma multiforme (GBM). GBM is one of the deadliest common primary brain tumors. This highly malignant tumor represents 50% of all types of primary gliomas in the central nervous system. Considering that in the last decades the mechanical properties of the cell environment together with the variable “stiffness” of cancer cells have emerged as a major determinant of cell behavior in terms of migration, proliferation and differentiation, these aspects are also of interest.

Particular attention will be devoted to papers describing new molecular pathways involved in GBM growth and progression and its biomechanical features. Moreover, studies on new molecules able to interfere with GBM growth and recurrence to yield new potential diagnostic and therapeutic targets are welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
