Functional Role of Cytokines in Cancer and Chronic Inflammation

Message from the Guest Editors

The articles published in this Special Issue will cover all aspects of fundamental and translational cytokine research for better understanding of cancer development and chronic inflammation-related diseases. This includes pathogenesis, progression and cytokine-specific therapeutic approaches. Keywords

- cytokines
- interleukins
- cytokine antagonists
- signaling pathways
- chronic inflammation
- immunometabolism
- cancer development
- cancer progression
- immunotherapy
- cytokine therapy

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
