

## Special Issue

# New Research on Anti-Inflammatory Molecules in Diseases

### Message from the Guest Editors

Allergic diseases are characterized by chronic inflammation. To date, the treatment of allergic diseases mainly includes the management and therapeutic education for patients and allergen avoidance, traditional pharmacotherapy (H1-antihistamines, corticosteroids and anti-leukotrienes, etc.), allergen immunotherapy, biologics administration, and other therapies. Many new classes of anti-inflammatory drugs are in development, highlighting the fact that there are many possible therapeutic targets in the allergic process. Topics will include (but are not limited to) the following: Individuation of new targets for allergic anti-inflammatory therapy; Natural products as novel therapeutic strategies in allergic diseases; New synthetic compounds with anti-inflammatory properties in allergic diseases.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
