

Special Issue

Distribution and Regularity of Genetic Epidemiology Interpreted from Molecular Perspective

Message from the Guest Editor

Genetic epidemiology is a field that combines the principles of genetics and epidemiology to understand the distribution and determinants of hereditary diseases in different populations. It seeks to identify genetic factors that influence disease susceptibility, progression, and response to treatment. This Issue delves into various studies that explore the epidemiology and molecular epidemiology of different hereditary diseases. These studies provide insights into the burden of hereditary diseases in children, frequent forms of hereditary diseases, and the heterogeneity of hereditary diseases in ethnic groups. The Issue also highlights the importance of molecular genetics in understanding the molecular nature of hereditary diseases, such as hearing disorders, oculocutaneous albinism, hereditary ophthalmic, and neurological pathology. *Prof. Rena A. Zinchenko*

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
