

## Special Issue

# Bioactive Molecules from Food Waste in Food Packaging Applications

### Message from the Guest Editor

The packaging plays a key role in preserving the foodstuffs' quality and shelf-life. In the last few decades, traditional food packaging materials have been turning towards more innovative and active ones. For this purpose, bioactive molecules extracted from fruits and vegetables have started being embedded inside packaging materials with the aim to confer peculiar properties such as antioxidant properties, antimicrobial properties, gas and moisture barriers, and so on, and improve the basic functionalities. To also be in line with the Circular Economy principles, agri-food wastes and by-products can easily be recovered for the purposes of extracting other interesting functional biomolecules in order to reach the same goal; therefore, reducing the negative impact on the ecosystems, which is generated by waste management. Based on these preliminary considerations, this Special Issue is devoted to presenting original research and review articles focused on realizing functional packaging materials, which contain embedded bioactive molecules derived from agri-food wastes and by-products.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
