

Special Issue

Novel Therapeutic Targets in Cancers: 4th Edition

Message from the Guest Editor

This Special Issue is the continuation of our previous Special Issues “Novel Therapeutic Targets in Cancers”; “Novel Therapeutic Targets in Cancers 2.0”; and “Novel Therapeutic Targets in Cancers: 3rd Edition”. In recent decades, novel precision oncology protocols have been developed and are now beginning to be adopted in routine clinical practice. However, despite major advances, the goal of transforming solid tumors into a chronic disease remains unfulfilled, and long-term remission has yet to be achieved. This Special Issue welcomes original research papers as well as concise review manuscripts from experts in these relevant fields. Topics of interest include, but are not limited to, the following:

- Solid tumor heterogeneity;
- Targeted therapy, including target identification and validation;
- Immune modulation;
- RNA-based therapy;
- Epigenetic therapy;
- Combination therapy, considering also sequential treatments and drug holidays;
- Cancer stem cell targeting;
- Recurrence mechanisms;
- Tumor evolution as defined by high-resolution transcriptomics;
- Preclinical modeling of the heterogeneous tumor milieu.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Inorganic Chemistry)
