

Special Issue

Gut Microbiota in Human Diseases and Health

Message from the Guest Editors

Cumulative knowledge has revealed that gut microbiota contributes to the development and progression of different chronic diseases, including Long-COVID-19 Syndrome. Gut dysbiosis can have an impact on multiple organs through several gut–organ axes. The aim of this Special Issue is to shed a light on knowledge that has been accumulated in the context of gut–organ axes with a focus on the potential role of gut microbiota composition in the pathogenesis of Long-COVID-19 Syndrome. The authors are encouraged to submit their original research studies concerning this topic. Review articles will also be taken into consideration.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
