Special Issue

Cellular and Molecular Mechanisms in Inflammatory Bowel Disease

Message from the Guest Editor

Inflammatory Bowel Disease (IBD) represents a significant and growing global health challenge. Recent advances underscore the multifactorial nature of IBD, implicating a complex interplay among genetic susceptibility, the dysregulation of the mucosal immune response, alterations in the gut microbiome, and diverse environmental and lifestyle factors. Systems biology and multi-omics approaches have revealed distinct molecular and cellular mechanisms underpinning IBD pathogenesis. Notably, transcriptomic and metatranscriptomic meta-analyses have identified robust pro-inflammatory signatures and disrupted epithelial and angiogenic pathways in IBD-affected tissues, providing novel insights into disease mechanisms and potential therapeutic targets. We particularly encourage submissions that leverage cutting-edge methodologies-such as integrated multiomics, advanced imaging, and computational modeling -to elucidate disease mechanisms and identify novel therapeutic targets. While we prioritize human studies, we also welcome high-quality research utilizing animal models and in vitro systems, provided that the findings are translatable to human disease.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
