

Special Issue

Natural and Synthetic Modified Nucleic Acids: Their Properties, Functions and Applications

Message from the Guest Editor

We are pleased to invite you to a publication in this Special Issue of *IJMS* titled 'Natural and Synthetic Modified Nucleic Acids: Their Properties, Functions and Applications'. The topic of this Special Issue is broad but focuses on the modifications of nucleosides found in natural nucleic acids DNA and RNA or intentionally introduced into synthetic oligonucleotides to increase stability, study interactions with other molecules, etc. We invite and encourage scientists to submit original research or review articles that address the latest aspects of research on nucleic acid modifications.

Guest Editor

Dr. Malgorzata Sierant

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
