

## Special Issue

# Advanced Research on CAR-T Cell Therapy

### Message from the Guest Editor

Although CAR T cell therapy is effective in liquid cancer therapy, its application in solid cancer is difficult. On the other hand, TCR T cell therapy appears to be effective in some cases, for example, NY-ESO-1 and MAGE-A4. Compared with the TCR-T cell therapy, infused CAR T cells cannot be maintained for long or their function decreases rapidly. As a majority of infused cells differentiate into effector memory or terminal memory cells, central memory and stem cell memory formation is not enough. In this Special Issue, several studies will be reported. The co-expression of IL-7 and CCL19 can recruit APC cells and activate bystander host cells and induce antigen spread. The co-expression of membrane-bound IL-12 induces memory differentiation after antigen stimulation and increased tumor suppression. Lymph-node-targeting amphiphile vaccine can boost CAR-T cells and induce antigen spread. Using these approaches and few new ones, several cases of solid tumors will be cured with CAR T cell therapy.

### Guest Editor

Dr. Yasushi Akahori

Department of Personalized Cancer Immunotherapy, Graduate School of Medicine, Mie University, Tsu 514-8507, Japan

### Deadline for manuscript submissions

20 August 2025

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
