

Special Issue

p53—Oncogene, Tumor Suppressor Gene, Guardian of the Genome and the Cell

Message from the Guest Editor

This Special Issue, titled “p53—Oncogene, Tumor Suppressor Gene, Guardian of the Genome and the Cell”, is dedicated to developing understanding of the ways in which the p53 protein contributes to regulating cell responses to stimuli originating from the inside of the cell or the cellular environment. Further, its featured works explore how the perturbation of this function affects disease development and anticancer therapy. Discovered 45 years ago, the p53 protein is the most studied of all proteins involved in both tumor formation and treatment. The reason for such an elevated position is the participation of p53 in nearly all types of cellular stress coordinating cellular responses to these stimuli. Both original research articles and comprehensive reviews are welcome for submission.

Guest Editor

Dr. Przemyslaw Bozko

Department of Internal Medicine I, Universitätsklinikum Tübingen and M3 Research Institute, University Tübingen, 72076 Tübingen, Germany

Deadline for manuscript submissions

20 May 2026

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
