

## Special Issue

# Viruses as Therapeutic Tools: Medical and Biotechnological Applications

### Message from the Guest Editor

This Special Issue is being overseen by Prof. , with invaluable assistance provided by Dr. Matias Luis Pidre from the Universidad Nacional de La Plata. The main objective of this Special Issue is to improve the current state of the literature by including works that explore key issues in applied virology, covering topics such as vaccine candidate development, antiviral strategies, and the use of viruses as gene therapy vectors, among others. We will also be open to receiving articles about virus–host interactions, from human viruses to animal viruses that lead to the generation of new technological tools or medical applications. We encourage you to contribute to this Special Issue: both original research and review articles are welcome.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
