

## Special Issue

# Natural Products for Cancer Therapy: Mechanisms, Synergies, and Clinical Applications

### Message from the Guest Editors

Cancer remains one of the leading causes of morbidity and mortality worldwide, with treatment strategies often limited by issues such as drug resistance, toxicity, and relapse. Owing to their bioactive properties and relatively low toxicity, natural products, particularly those derived from traditional medicinal plants, have emerged as promising candidates for cancer treatment.

The integration of traditional Chinese medicine (TCM) with modern Western medicine has the potential to increase the efficacy of cancer treatment and reduce side-effects. TCM offers a rich source of bioactive compounds that have been used for centuries to treat various diseases, including cancer.

This Special Issue aims to provide a comprehensive understanding of the role of natural products in cancer therapy, with a particular focus on their potential to revolutionize current treatment paradigms. By highlighting the synergy between natural and synthetic approaches, we hope to inspire new avenues for cancer treatment, contributing to improving outcomes of patients with cancer.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
