The Role of Extracellular Vesicles in Inflammatory Diseases

Message from the Guest Editor

Extracellular vesicles (EVs) are nano-sized bodies, secreted by cells into the extracellular environment. In the past, EVs were considered 'cellular dust'; however, a growing body of evidence indicates that EVs are an important contributor in various diseased conditions. Over the past few decades, EVs have been shown to influence various inflammatory diseased conditions via the transfer of their cargo in the form of nucleic acids, proteins, lipids, metabolites, etc., between cells. The present Special Issue focuses on how EVs contribute to the pathogenesis of inflammatory diseases. EV application in therapeutic agents for inflammation-associated diseases will also be covered in the present Special Issue.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
