

## Special Issue

# Advances of the Pentatricopeptide Repeat (PPR) in Plants

### Message from the Guest Editor

The pentatricopeptide repeat (PPR) proteins are a very large family in plants and play an important role in the growth and development of plants. PPR protein can affect the expression of organelle genes and regulate chloroplast development, grain development and stress resistance. Studying the function of PPR protein not only provides new insights into the communication between nuclear encoded proteins and organelles, but also lays a foundation for the discovery or creation of new resistant germplasm in crops.

### Guest Editor

Dr. Qiang Zhang

State Key Laboratory of Rice Biology and Breeding, China National Rice Research Institute, Hangzhou, China

### Deadline for manuscript submissions

closed (31 August 2024)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
