

## Special Issue

# New Advances in Oral Microbiome

### Message from the Guest Editor

Following recent scientific findings in the molecular microbiology field, the oral microbiota, i.e., the complex and dynamic microbial community resident in the oral cavity, has been found to represent a sine qua non-condition for oral health as well as the emergence of degenerative systemic diseases such as digestive apparatus diseases, articular diseases, cancer, and neuronal illnesses. In this context, this Special Issue aims to serve as an exhaustive collection of new scientific data and ideas about the role of this human microbial tissue, in the fields of oral pathology, systemic diseases, and laboratory diagnosis. Indeed, a greater biological understanding and novel analytical approaches could be effective clinical management strategies for the major current degenerative diseases associated with oral microbiota. Dr. Giovanna Mosaico ([gimosaico@tiscali.it](mailto:gimosaico@tiscali.it)) and Dr. Cinzia Casuis ([ginzia.85@hotmail.it](mailto:ginzia.85@hotmail.it)) are serving as research assistants and will assist Professor Germano Orrù in managing this issue.

### Guest Editor

Prof. Dr. Germano Orru

Molecular Biology Service (AOU-Cagliari), Department of Surgical Sciences, University of Cagliari, Cagliari, Italy

### Deadline for manuscript submissions

closed (20 January 2024)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
