Complications of Type 1 Diabetes in Pediatric Age: Early Biomarkers and New Insights into Diagnosis and Prevention Strategies

Message from the Guest Editors

The evolution of treatment and monitoring technologies for type 1 diabetes has significantly improved the diagnostic and therapeutic approach and the natural history of the disease, but probably the complications of type 1 diabetes in childhood are still underestimated.

As the prevention of vascular complications is crucial in children with T1D, the identification of new insights, tools, and biomarkers to identify individuals at increased risk is mandatory, and more information remains to be explored in the field of prevention, which starts in childhood.

SCOPE: This Special Issue entitled 'Complications of Type 1 Diabetes in Pediatric Age: Early Biomarkers and New Insights Into Diagnosis and Prevention Strategies' welcomes manuscripts in the formats of research articles, short communications, case reports, and reviews. Manuscripts should focus on the diagnosis and management of complications of type 1 diabetes in children and adolescents.

This Special Issue is supervised by and assisted by (Federico II University of Naples).

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
