

## Special Issue

# Molecular Insights into Sphingolipids

### Message from the Guest Editor

A strong case is emerging that bioactive sphingolipids, although only a minor constituent of the global lipid milieu in cells and tissues, play a central role in regulating metabolic functions. Specific bioactive sphingolipids have been identified as physiological and pathogenic mediators in metabolic disorders, such as non-alcoholic fatty liver disease (NAFLD), diabetes, or cardiovascular dysfunctions, as well as multifactorial disease such as cancer. Circulating mediators that are released from adipose tissue (e.g., adipokines, inflammatory cytokines) specifically modulate enzymes that are involved in sphingolipid synthesis and degradation. Striking progress has been made over the last few years in elucidating the complex crosstalk between sphingolipids, especially sphingosine 1-phosphate (S1P) and its specific receptors, and the development of several diseases, as scientists have discerned that pharmacological intervention (or the genetic ablation of enzymes controlling sphingolipid synthesis or degradation) and S1P signalling have beneficial effects on these disorders.

### Guest Editor

Dr. Elisabetta Meacci

Department of Experimental and Clinical Biomedical Sciences "Mario Serio", University of Florence, 50134 Firenze, Italy

### Deadline for manuscript submissions

closed (30 November 2024)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
