Dietary Bioactive Compounds and Their Impact in Epigenetic Chemoprevention

Message from the Guest Editors

This Special Issue plans to give an overview of the most recent advances in epigenetic chemoprevention and therapy with the application of natural bioactive compounds as a potential source of epigenetic biomarkers for dietary exposures and anti-cancer therapies based on plant bioactive components. Potential topics include, but are not limited to:

- Dietary bioactive compounds targeting epigenetic pathways in cancer;
- Epigenetic chemoprevention;
- Epigenetic anti-cancer therapy;
- Epigenetic biomarkers for dietary exposures.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
