Immunity, Inflammation, and Injury in the Pathogenesis and Progression of Kidney Diseases –from Bench to Bedside

Message from the Guest Editors

Innate immunity is connected to all aspects of renal pathophysiology—from proteinuria through inborn anomalies, glomerulopathies, hypertension, nephrolithiasis, until end-stage kidney disease. It could be both the culprit and the victim of kidney dysfunction. Let this Special Issue become a platform of exchanging ideas between scientists dealing with micromolecular tasks and clinicians compelled to solve macromolecular clinical problems for the patients' good.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
