

## Special Issue

# Drug Metabolism and Drug-Induced Liver Injury

### Message from the Guest Editor

Idiosyncratic drug-induced liver injury (iDILI) represents one of the most cited toxicities associated with medications including small molecules and biologics. Managing DILI is a big challenge for clinicians, industries, and regulatory agencies. iDILI is an unpredictable adverse effect as it only occurs in a small portion of patients. The mechanism of iDILI is extremely complex and complicated. The adaptive immune system can mediate most iDILI cases, but the triggering factors remain unclear. Previous studies revealed a connection between metabolism and drugs commonly causing iDILI with causality. The lack of an animal model of iDILI that can mimic human iDILI means that mechanistic studies are urgently needed. Our current understanding of the mechanistic steps leading to injury is particularly fragmentary. Understanding the mechanism underlying iDILI will allow us to predict, prevent, and manage toxicity. This Special Issue invites original research and review articles addressing the pathogenesis, underlying mechanisms, new tools for investigating drug metabolism and DILI, and the in silico prediction of drug metabolism and iDILI.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
